

# **Newly Planted Trees 2022-23**

Report prepared for  
**Nagarpanchayat  
Malegaon Bk.**  
Baramati, Pune.

Prepared by  
**Agro Diamond, Baramati,**  
**Pune Baramati – 413102**

## **ACKNOWLEDGEMENTS**

We sincerely thank Smita Kale Madam, Honorable Nagar panchayat Chief Officer of Nagar panchayat Malegaon Bk. For giving us the opportunity of conducting Tree Census of the Nagar panchayat. We are grateful to Honorable Chairman and Members of Tree Authority of Nagar panchayat Malegaon Bk. For necessary support and approvals for undertaking and completing this project.

Our sincere thanks to Mr. Vivek Hake for advising us on the project implementation, plan and monitoring of the technical details. Their timely suggestions helped us to complete the project. We hereby also thank Mr. Suresh Sawant for his continuous support, guidance, and technical inputs.

We hereby thank and appreciate the support and assistance given by the staff of Garden Department during project field-work. We place on record our sincere appreciation for the field and analytical work completed by all botanists, field officers and office assistants.

**Thanking you,**

**Director and Strategist**

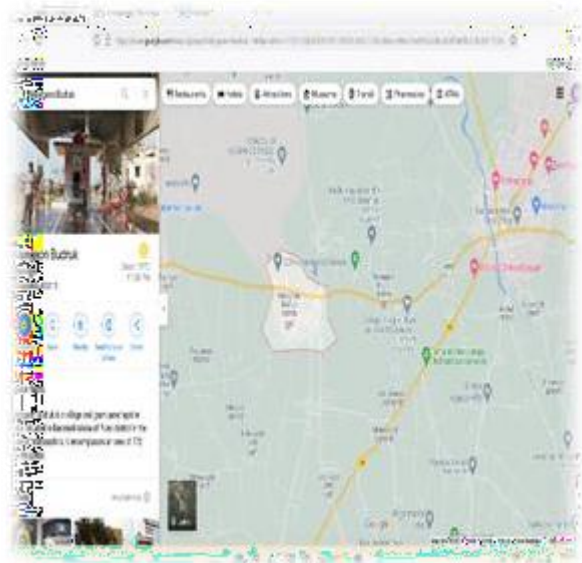

**Agro Diamond, Baramati.**

## About Malegaon Bk.

### Background of Malegaon Bk City:

According to Census 2011 information the location code of Malegaon Bk is 556949. NP Malegaon Bk was established 30 March 2021 and located in Baramati Tehsil of Pune district in Maharashtra, India. It is situated 8 km away from sub-district headquarter Baramati and 80km away from district headquarter Pune.

The total geographical area of NP Malegaon Bk. is 1854.47 hectares. According to Census 2011 Malegaon Bk has a total population of 21,284 peoples. There are about 3,945 houses in NP Malegaon Bk. Baramati is nearest town to Malegaon Bk which is approximately 8km away.

## **PROJECT TEAM**

<b>Project Co-ordinators</b>	Tushar Tengale
<b>Plant Taxonomists</b>	Saurabh Raut
<b>Field officers</b>	Sahil Kharat
	Rohan Hapse
	Ashok Shinde
	Yashraj Kale
	Viki Burungale

## 1. EXECUTIVE SUMMARY

Tree Census of **Nagarpanchayat Malegaon Bk.** was carried out during year JAN 2022 in 6 Wards of city, spread over an area of 18.54 sq. km. Geo-coordinates of each tree were recorded using GPS instruments. The extensive field work resulted into count of 2849 trees. For each tree, attributes like its Local name, Height, Age, Health condition and GPS coordinates were recorded in field. Summary in tabular form is given below:

SN	Component	Result and Description
1	Number of Tree species	25 species
2	Number of Individual (Trees)	Total 7860 were counted in 3 No Ward
3	Dominant Tree species	Tree
4	Young Population	97 % of tree population has girth less than 2 cm
5	Healthy Tree Population	7860 trees are healthy
6	Number of Native species	97%
7	Native Population	7740 trees
8	Maximum trees in Ownership	Government

## 2. INTRODUCTION

Trees play a vital role in the Urban Ecosystem. They provide numerous benefits both tangible and intangible, to residents, visitors, and neighboring communities. Trees also play important roles in the quality of life and the sustainability of City's urban environment. Healthy urban trees can improve the local environment and lessen the impact resulting from urbanization and industry. Trees improve air quality by manufacturing oxygen and absorbing carbon dioxide (CO<sub>2</sub>), as well as filtering and reducing airborne particulate matter such as smoke and dust. Urban trees reduce energy consumption by shading structures from solar energy and reducing the overall rise in temperature created through urban heat. Trees slow and reduce storm water runoff, helping to protect critical waterways from excess pollutants and particulates. In addition, urban trees provide critical habitat for wildlife and promote a connection to the natural world. In addition to these direct improvements, healthy urban trees increase the overall attractiveness of a community and have been proven to increase the value of local real estate by 7 to 10%, as well as promoting shopping, retail sales, and tourism (Wolf, 2007).

Trees support a more liveable community, fostering psychological health and providing residents with a greater sense of place (Ulrich, 1986; Kaplan, 1989). Community trees, both public and private, soften the urban hardscape by providing a green sanctuary and making City a more enjoyable place to live, work, and play. Malegaon Budruk has 78,000 trees playing a prominent role in the urban ecosystem of city and providing benefit to residents. Maharashtra State Government has enacted an act "The Maharashtra (Urban Areas) Preservation of Trees Act", no. XLIV of 1975 (last amended as modified up to 9th June 2004). It was formed for preservation, protection and plantation of trees in the urban areas. As per the section of 7 (b) of the said Act, it is duty on the Tree Authority of the Municipal Corporation to carry out a census of trees in all lands within the jurisdiction once in every five years. Following this act **Nagar panchayat Malegaon Bk** has constituted the "Tree Authority" under the Chairmanship of Chief Officer, which has responsibility to implement this act and conduct tree census in city limits. To carry out tree census for the city of **Nagar panchayat Malegaon Bk**, awarded this project to Vasundhara Enviro engineers. We as company have experience to conduct tree census Each tree inventoried on this project is inspected by a qualified Botanist who recorded information including species, size, condition, and current maintenance needs, as well as the geographic location. This work resulted in inventory of approx. 78,000 trees within City limits. The City is located in Pune region encompassing an area of 18.54 km<sup>2</sup> at

an elevation of around average 11 meter above mean sea level, City enjoys a mild climate with an average rainfall around 91.6 inches.

### **Objectives:**

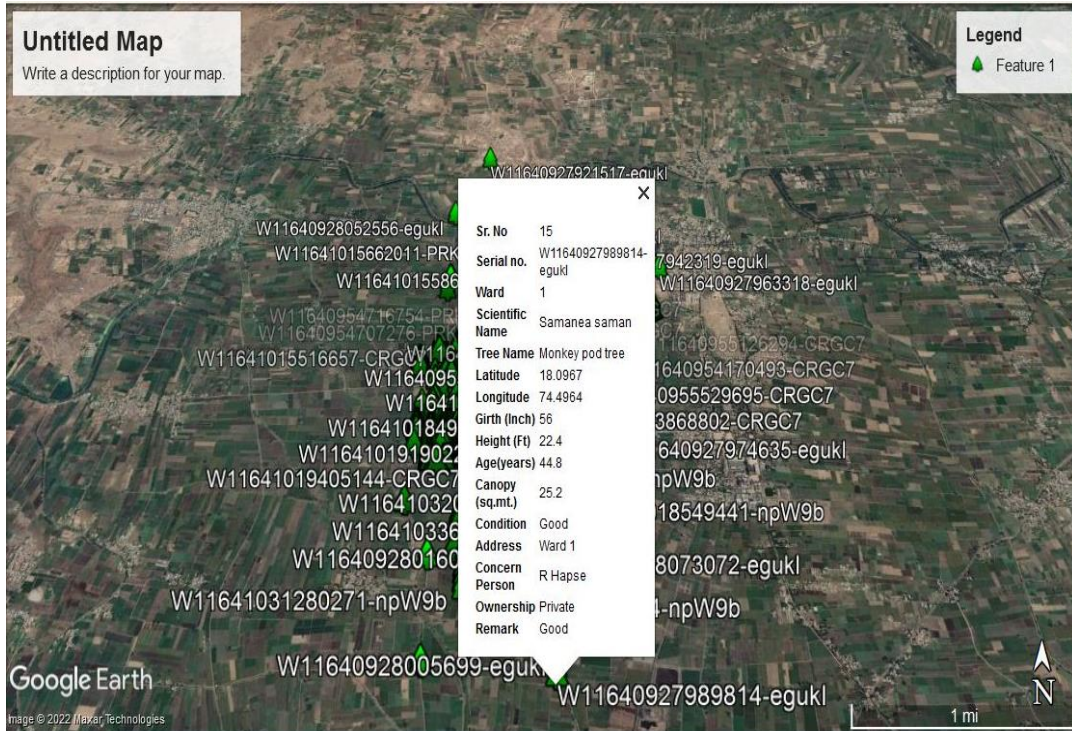

- To find out the number of trees in individual wards as per the guidelines.
- To find out the number of trees in different ownerships.
- To provide the information to Nagar panchayat Malegaon Bk on medicinal, aesthetic, social & culturally important information.
- To give Botanical name, English name & Local name of each species found in Nagar panchayat Malegaon Bk area.

### **3. METHODOLOGY**

---

Trees having woody stem and having minimum girth of 10 cm in diameter at the chest level of an average height person and height of about 3 m high were counted. Trees which fit in these criteria were inventories. Tree census was done in year 2021-22. Field work was done by team of qualified botanist. Data was collected from all wards of Nagar panchayat Malegaon Bk using GPS instruments. Information like Scientific Name, Common name, Girth, Height, Condition, GPS location was recorded in field itself. This data was fed into 'Tree Census', proprietary Application of Vasundhara Enviro Engineers. Which is GPS based user friendly Application. This Application allows users to monitor & analyse tree inventory information with analytical tools and tree knowledge bank through various viewing features. Using filters, we can select data based on tree type, tree name, girth, conditions etc. as per the user requirement. In all teams consisting of botanist, were in the field for counting the trees. During the field work, the team noted down location, housing society's name etc. and counted each individual tree, measured the girth, noted down the approximate height and age of the same. The condition of the tree whether in healthy condition, infected condition, dead or mechanically cut – were mentioned. Trees growing on the roadside, in the government plots and in the private plots were included in the census. Most of the tree identification was done in field. In case of unidentified trees, specimens were collected and identified with help of literature. Literature used for tree identification is Flora of Maharashtra (Almeida 1996, 1998, 2001, 2003 & 2009), Flora of Maharashtra (Lakshminarasimhan, P. 1996), (Singh N.P & S. Karthikeyan, 2000 & 2001) (Correct plant and family names were used with the help of online plant name

## RECOMMENDATIONS

### Plantation

- Tree count in park and industrial premises is very low. These two areas have good scope of new plantations.
- Prabhags ... and ... have large open space and should be consider for new plantations.
- Invasive tree population is high and hence preference should be given to native flora.
- Species diversity of native flora is good and thus city supports native vegetation.
- Tree species belonging to Fig family like Vad, Pimpal, Umbar, etc which are native trees should give preference for new plantation. This will not only increase green cover but also supports many other life forms like Birds, Arboreal Mammals, insects, etc.
- Plantations, Conservation and maintenance of Endangered and Vulnerable species should be done to enhance city's tree diversity.

**Removals:**

- Subabhul which is consider as major invasive tree species in India should not be further planted and removal of them is recommended.

**Maintenance:**

- City has good population of healthy trees, but special attention should be given to diseased and dangerous trees.
- Young population of trees in city is high and thus requires protection from getting cut.
- Regular maintenance and pruning of mature trees will lessen the nuisances created by tree felling.
